SUMMARY

Full stack developer with 7+ years of commercial experience building a wide range of IT projects, including internal business systems, data processing platforms, integrations, and web applications. Strong backend focus with Python and the Django ecosystem, combined with practical frontend experience using React, JavaScript, and various other languages, frameworks, and technologies.

Experienced in developing and maintaining systems with complex business logic, database-heavy applications, integrations with external services, and data pipelines. Participated in projects throughout the entire development lifecycle, from initial planning and requirements gathering to deployment and long-term support.

In smaller and mid-sized projects, often took ownership of the entire development process, including business analysis, client communication, technical decision-making, backend and frontend implementation, deployment, and support. Comfortable working across the full software development lifecycle in both team-based and independent environments.

IT SKILLS

- Solid experience with **Python (Django, Pyramid, Flask, FastAPI, Apache Airflow)**
- Experience with **Java (Spring Boot)**
- Developed frontend with **JavaScript** and **React**
- Experience with **PHP (WordPress, Magento, PrestaShop)**
- Slight experience with **C#, C++, Scala, VisualBasic**
- Experience with **Docker** and **Kubernetes**, currently taking Kubernetes admin course
- Almost all projects required usage of **databases (MySQL, PostgreSQL, Oracle)**

- Also used assisting technologies like **HTML, CSS, REST, Git, Linux, Kubernetes**
- Deployed projects on servers and managed them, wrote **Docker** files and configs
- Wrote **unit tests (pytest)**
- Actively used **AI tools** such as Claude Code and Junie, including **OpenSpec**

WORK EXPERIENCE (RELEVANT)

Red Function OÜ

Full stack developer

June 2019 - present

Outsource software development for clients. Projects:

- Internal use website and data processing and analyzing system for Bank of Estonia (Apache Airflow + FastAPI + Pandas + Spring Boot + Oracle Database + React + AWS S3) with multi thread asynchronous data processing pipelines and complicated business logic
- Internal use website for Eesti Gaas (Django + PostgreSQL + React) with heavy business logic (entire client database, bills, gas pipe system database)
- Client database webapp for water supply company (Django + PostgreSQL)
- Internal use data exchange service for a huge telecom company (Pyramid, PostgreSQL)
- Scoro integration with e-commerce platforms service (Python)
- Shopify theme development
- Plugins for e-commerce platform (WordPress, Magento, PrestaShop) for integration with external services
- Plugin for data analysis for MS Excel + server for data storage (Django + PostgreSQL)

WORK EXPERIENCE (NOT AS RELEVANT)

Sep 2021 - Apr 2022 Edukoht - Programming mentor for kids

Jul 2021, Jul 2022 Vihasoo youth camp - Youth worker

Oct 2020 - Sep 2021 Estonian Rescue Board - Volunteer rescuer (obligatory military service replacement)

Sep 2019 - Jun 2020 Nõo High School - Robotics and programming teacher

Jun - Aug 2018 Southwestern Advantage - Door to door salesman (in USA)

Jul 2016 - Jul 2017	Kuldse Notsu Kõrts/Hermitage (Restaurant) - Waiter
Jun - Aug 2015	Al Bastione Restoran OÜ - Helper

EDUCATION

2017-2020	University of Tartu - Bachelor of Informatics
2005-2017	Tallinn Läänemere High school

LANGUAGES	Russian - mother tongue
	Estonian - fluent
	English - fluent
	Japanese - beginner

EXTRA INFO

Participated in youth cultural projects in Europe and in Japan, participated in Work and Travel in the USA (selling books).

Did voluntary work with kids - teaching programming, Lego, working in summer and hobby camps. In 2018 participated in Noored Koodi (Youth into coding) program.

Learning to play guitar and sing, dreaming of making a garage rock band
